criterion queued for (re)verification (§9.5)
Immutable context packet (§11.5) + pinned model & settings — manifest: chunks, commit, budget, model version, prompt hash
PASS 1 — SCOPE
Decompose or confirm atomic criteria; retrieve candidate code and tests (diff summary · symbol/test index)
applicable evidence found?
[no] nothing applicable
INSUFFICIENT_EVIDENCE — stop; stop reason logged (§11.4)
[yes]
PASS 2 — VERIFY
Inspect relevant implementation details and test evidence (top diff hunks · symbols · dependency neighbourhood · tests)
citations valid and no conflict?
[yes] pass 2 stops (§11.4)
[no] disputed · contradictory · weakly cited → critic
PASS 3 — CRITIC (conditional)
Audit a disputed, contradictory or weakly cited result: confirm · downgrade · abstain. Never exceeds the fixed pass limit.
verdict + citations (§11.6)
Pass cap: at most 3 passes. Every pass logs its inputs, outputs and stop reason. Same packet + pinned model/settings → the same passes — reproducible (§11.4).
Hard gate 2 (measurement fitness): the same packet run 3 times at temperature 0 must agree at least 95%; below that the configuration is not fit to be measured.
Structured output (§11.6): criterion_id · status · evidence[] · reason · missing_evidence · divergence_tag · model_and_run — required before the gate.
Model server off: the loop is unavailable → INSUFFICIENT_EVIDENCE, marked not skipped; deterministic Rules 1–3 + unresolved-evidence reporting survive — never fabricate (§14).
VERDICT / PROVENANCE GATE — deterministic, between verifier and reviewer (§11.8)
1 · Schema validation — malformed rejected, not leniently parsed (§11.8)
2 · Citation resolution — every citation checked against the immutable packet
3 · Applicability · link eligibility · freshness · thresholds
4 · HARD GATE 1 — a verdict citing no evidence span is rejected, counted as an abstention (100%)
5 · Provenance — packet · model/settings · pass · citations (100% target)
[all checks pass]
[any check fails]
DOWNGRADE — review / INSUFFICIENT_EVIDENCE, reason logged; never shown as decisive (§11.8)
DECISIVE — SUPPORTED / CONTRADICTED / PARTIAL → evidence case, provenance complete (§11.7)
